

Payment Gateway™

Broaden Your Payment Options

Introducing Digital Dispatch Payment Gateway™ for managing cashless payment options: **Prepaid Gift Cards** and **Account Cards**.

Payment Gateway™ is a total solution that allows you to issue and activate cards, and manage corporate or institutional accounts.

Drivers accepting cards simply swipe the card through the credit card reader.

A web-based payment interface lets your company stay in control of card sales, card activation, account information and reloads as well as management information reports on transactions.

Payment Gateway™ Advantages

- Increased revenue from transaction fees and surcharges
- Increased customer loyalty from customers who choose your cab as the preferred taxi
- Increased payment security and convenience for customers and drivers. Less cash and paper to manage
- Lower overhead and administration than vouchers

Prepaid Cards

Like gift cards, prepaid cards are fixed-value cards that consumers purchase to pay for cab fares. Once purchased, they can be used or given away as gifts, promotions or incentives.

To pay for a fare, the consumer presents the card to be swiped. The transaction (fare amount) is deducted

from the card's balance. Prepaid cards have a declining balance that consumers can reload at any time by making a credit card payment.

The card can be re-used until the balance is empty. Consumers can reload the card's value (bring the balance up to the original value) at any time by making an online credit card payment to the Payment Gateway™ client web site.

Account Cards

Account cards look like credit cards but act like vouchers to pay for cab rides that are billed to accounts for your corporate and institutional customers. They have an increasing balance. Your account customer is billed monthly for each card's usage.

Why use a card instead of vouchers? The swipe card simplifies the collection, payment, tracking, and accounting of cab fares paid on account for both you and your account customer.

Popular with law firms, hospitals, government agencies and schools, account cards can be used by staff or clients.

Once issued, the account cards can be used for as long as the account is active. Account cards can also be deactivated individually.

Account cards can be issued for one-time usage for clients of account holders. Accounts are synchronized with existing accounts managed in the dispatch application.

Easy to set up, Payment Gateway™ offers an intuitive web interface for account cards administration.

Web Interface

Payment Gateway™ offers a secure web interface for consumers to reload prepaid cards by making a secure online payment (credit card). Customers can check the balance on a prepaid card from the web interface or from the cab before paying for the trip similar to a credit card preauthorization.

Reports

Payment Gateway™ features a comprehensive set of ready-to-run reports that can be used with the FleetManager™ report package.
